Performa 500

Processor UPGRADE

Product Highlights

- Upgrades 233 MHz and higher Celeron "stick" and Pentium II processor-based systems
- Adapts easily to Slot-1 Pentium II motherboards
- Provides performance increase needed to run Microsoft's® next generation Desktop OS
- Supports Windows 98, Windows 95, Windows NT®, Windows 3.x & DOS
- Software reinstallation not required
- Includes illustrated guide for easy installation
- Three-year warranty

Evergreen Performa 500 Processor Upgrade

The Evergreen **Performa 500** is a high-performance subsystem upgrade for 233 MHz and higher speed Celeron™ "stick" and Pentium II® processor-based PCs. The Performa 500 can increase a PC's performance to that of an original 500 MHz system and features the newest processor design with MMX™ support included.

This innovative upgrade allows users to migrate to 500 MHz applications. The Performa 500 delivers the power and performance needed for today's software and more demanding Windows® 2000 applications.

Features

- Upgrades 233 MHz and higher speed Celeron “stick” and Pentium II processor-based PCs
- 500 MHz microprocessor
- Includes MMX™ instructions for enhanced graphics
- 128K on board L2 cache
- Plugs into standard Slot 1 motherboard
- BIOS update software for selected systems
- Three-year warranty

Benefits

- New PC performance for today’s software
- Superior 3D graphics, enhanced video and sound
- Extends the life of older PCs

Product Specifications:

- Supports Slot 1 motherboards
- Includes heatsink/cooling fan
- Supports single processor systems
- Automatic clock multiplier

Physical Dimensions:

- Width: 2.80", 71.17 mm
- Length: 5.0", 153.8 mm
- Height: 1.66", 42.34 mm
